Doing our part to keep BC's environment free of scrap tires

TIRE STEWARDSHIP BC is a not-for-profit society formed to manage BC's **tire recycling** program. The program collects an Advance Disposal Fee, commonly referred to as an **eco fee**, on the sale of every new tire. The fees are used to pay for transporting and recycling BC generated scrap tires, ensuring that these tires are disposed of in **environmentally responsible** ways instead of ending up in our landfills.

Scrap tires are ground into crumb rubber and used to create a variety of products including athletic tracks and synthetic turf fields.

Other innovative products made from crumb rubber are: non-slip pavers for patios, walkways and playgrounds; colourful, resilient flooring commonly seen in recreational facilities; flooring and mats for agricultural and industrial use; asphalt rubber.

GREEN FACT

Over 80% of the 33,000 tonnes of scrap tires collected each year are recycled into products. The remainder are used as a fuel supplement.
